Date Released: Third Quarter 2013

New Home Market

Housing starts higher in Alberta but moderate in Manitoba and Saskatchewan in Q2 2013

Housing starts in the Prairie Provinces totalled 14,573 units during the second quarter of 2013, up 1.4 per cent from 14,365 a year earlier. There were 7,442 single-detached starts in the second quarter of 2013, down 4.7 per cent compared to 7,806 units in the same period of 2012. Multi-family starts, which consist of semi-detached, row, and apartment units, amounted to 7,131 units, up 8.7 per cent from the second quarter of 2012. Through six months of 2013, Prairie housing starts have reached 24,108 units, 2.1 per cent higher than the first half of 2012.

In Alberta, there were 10,435 housing starts during the second quarter of 2013, up 10.6 per cent from a year earlier. Single-detached starts increased 5.2 per cent to 5,108 units while multi-family starts increased 16.3 per cent to 5,327 units. Housing starts in June were not impacted by the flooding in Alberta as all enumerators had completed their field work prior to the June flooding. Temporary housing created for families displaced by the flood will not be counted as a housing start in the coming months, provided they are not constructed on permanent foundations. After two quarters of 2013, housing starts in Alberta totalled 17,424 units, up 9.4 per cent from the first six months of 2012.

In the Edmonton CMA, second quarter 2013 housing starts of 5,117 units were 57 per cent higher than a year earlier. Second quarter single-detached starts amounted to 1,675 units while multi-family starts reached 3,442 units, up 11 per cent and 97 per cent, respectively. The elevated pace of multi-family starts in the Edmonton CMA is expected to decline in the second half of 2013. Year-to-date, multi-family starts have amounted to 5,166 units in the Edmonton CMA, up 80 per cent year-over year. Single-detached starts to the end of June reached 2,800 units, a 7.9 per cent increase from last year. At mid-year, total housing starts in the Edmonton CMA reached 7,966 units, up 46 per cent from the 5,468 units started in the same period in 2012.

In the Calgary CMA, housing starts in the second quarter of 2013 amounted to 3,057 units, down 20.5 per cent from the second quarter of 2012. While single-detached starts increased five per cent to 1,658 units, the gain was offset by a 38 per cent reduction in multi-family starts to 1,399 units. Year-to-date, total housing starts in the Calgary CMA have declined 21 per cent to 5,562 units. After six months, single-detached starts in the Calgary CMA have increased nine per cent to 3,085 units. In the same period, multi-family starts declined 41 per cent to 2,477 units. This comes after substantial growth in Calgary's multi-family market last year.

Housing construction in Alberta's five largest Census Agglomerations (CAs) reported mixed results during the second quarter of 2013. Housing starts in Grande Prairie declined from 225 in the second quarter of 2012 to 202 units this year. In Lethbridge, housing starts decreased from 161 to 152 units and Medicine Hat also experienced a lower level of production from 94 to 84 units. In Red Deer, housing starts were almost unchanged at 178 units in the second quarter. In Wood Buffalo, the initiation of 87 social housing units helped increase housing starts from 120 units from April to June 2012 to 257 units this year.

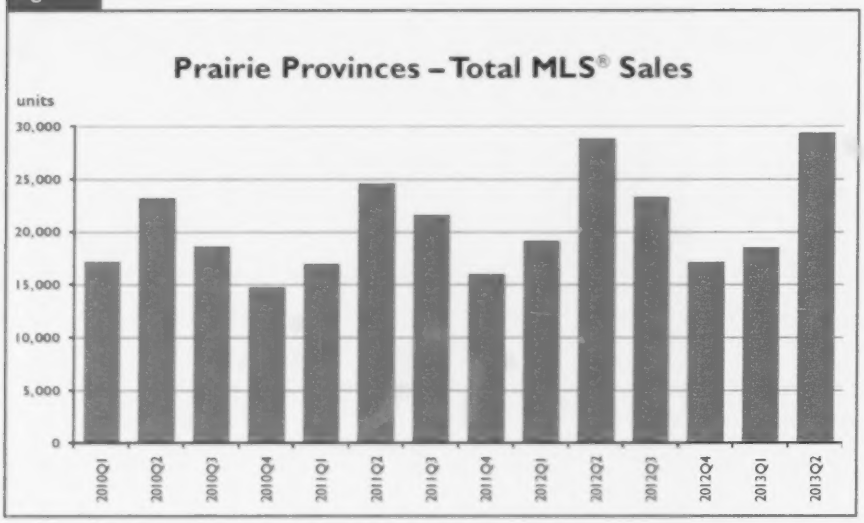
In Saskatchewan, housing starts of 2,157 in the second quarter of 2013 represented a 22 per cent reduction from 2,766 in the second quarter of 2012. There were 1,219 single-detached starts and 938 multi-family starts, representing decreases of 29 per cent and 11 per cent, respectively. Year-to-date, housing starts in Saskatchewan amounted to 3,406 units, down 22 per cent from the same period in 2012. Year-to-date single-detached starts decreased 27 per cent to 1,809 units. Meanwhile, multi-family starts totalled 1,597 units, down 15.3 per cent. In 2012, housing starts in Saskatchewan increased 41.8 per cent to the highest level since 1979. A pullback in housing starts this year was expected, however activity will remain above the preceding five-year average.

In the Regina CMA, housing starts totalled 880 units in the second quarter of 2013, up from 685 units a year earlier. This brought Regina's year-to-date housing starts to 1,475 units, an increase of 3.5 per cent from the same period in 2012. In the Saskatoon CMA, second quarter housing starts of 629 units represented a 32 per cent decline from 927 units last year. Year-to-date, housing starts in the Saskatoon CMA have reached 1,094 units, down 29.6 per cent from 1,555 units a year earlier.

In Manitoba, the 1,981 housing starts in the second quarter of 2013 represented a decline of 8.4 per cent from 2,163 units last year. There were 1,115 single-detached starts and 866 multi-family starts in the second quarter, representing decreases of 10 per cent and seven per cent, respectively. At mid-year, housing starts in Manitoba reached 3,278 units, down 1.2 per cent from 3,319 in 2012. Year-to date, there have been 1,670 single-detached starts, a decrease of 8.7 per cent from 1,829 last year. Multi-family starts in Manitoba after two quarters amounted to 1,608 units, an increase of 7.9 per cent from a year earlier.

In Manitoba's two largest centres, Winnipeg and Brandon, housing starts increased in the second quarter. In the Winnipeg CMA, housing starts in the second quarter totalled 1,280 units, up 9.3 per cent from a year earlier. Single-detached starts increased to 725 units from 552 units a year earlier while multi-family starts declined to 555 units from 619. On a year-to-date basis, housing starts in Winnipeg have reached 2,171 units, up 13 per cent from 2012. Single-detached starts have increased 20 per cent to 1,133 units while multi-family starts have increased 6.2 per cent to 1,038 units from mid-year 2012. Year-

Figure 2



Source: CREA (Raw)

to-date, rental starts in the Winnipeg CMA represented 63 per cent of all multi-family starts. In the Brandon CA, there were 99 housing starts in the second quarter of 2013 compared to 61 a year earlier. After six months, housing starts in Brandon amounted to 139 units, a decrease of 8.6 per cent from mid-year 2012.

Resale Market

Second quarter 2013 MLS® sales higher in the Prairie Region

In the Prairie Region, resale transactions amounted to 29,358 units in the second quarter of 2013, up 1.9 per cent from the second quarter of 2012. This brought year-to-date MLS® sales to 47,798, down fractionally by 0.3 per cent from mid-year 2012. In Alberta, second quarter MLS® sales amounted to 20,520, up 4.8 per cent from the same period in 2012. In Saskatchewan and Manitoba, resale transactions declined by four per cent and 4.7 per cent respectively, to 4,246 and 4,592 units. The record levels of MLS® sales in 2012 in Manitoba and Saskatchewan are not expected to be surpassed this year, but activity is expected to remain elevated.

The average MLS® price continued to trend higher in all three Prairie Provinces during the second quarter of 2013. In Alberta, the average resale price in the second quarter of 2013 was $383,630, up 3.6 per cent from a year earlier. In Saskatchewan, the average resale price increased 6.0 per cent to $295,034. In Manitoba, the average MLS® price was $265,899 in the second quarter, up 4.7 per cent from a year earlier.

Economy

Migration continues to support housing demand

Net migration to the Prairie region amounted to 31,652 people during the first quarter of 2013, up 21 per cent from a year earlier. In Alberta, first quarter 2013 net migration increased 33 per cent to 27,112 people, helping propel housing demand. In Saskatchewan, net migration amounted to 2,738 in the first quarter of 2013, down from 3,688 a year earlier. In Manitoba, net migration amounted to 1,802, down from 2,096 in the first quarter of 2012. Despite reductions of net migration to Saskatchewan and Manitoba, net inflows will continue to support housing demand.

Migrants will continue to be drawn to the Prairie region as economic growth translates to favourable labour market conditions. At mid-year 2013, full-time employment in Alberta was higher by 66,200 positions from mid-year 2012. In Saskatchewan, full-time employment rose by 17,200 positions year-over-year while Manitoba full-time employment increased by 5,000. Employment growth continued to keep the unemployment rates relatively low in the Prairie Provinces. In the second quarter of 2013, the seasonally adjusted unemployment rate was lowest in Saskatchewan at 4.1per cent, while Manitoba's was the highest in the region at 5.5 per cent. In Alberta, the comparable unemployment rate was 4.7 per cent, well below the national average of 7.1 per cent.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2011 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modeled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "**dwelling unit**", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "**start**", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "**under construction**" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "**completion**", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "**absorbed**" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A "**Single-Detached**" dwelling (also referred to as "**Single**") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "**Semi-Detached (Double)**" dwelling (also referred to as "**Semi**") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "**Row (Townhouse)**" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "**Apartment and other**" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The "**intended market**" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "**Rural**" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 65 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable housing solutions that will continue to create vibrant and healthy communities and cities across the country.
